PROFILE

I am a Product Designer with more than five years of experience designing digital products for startups and businesses. I specialize in creating intuitive, scalable, and human-centered experiences across mobile applications, SaaS platforms, and enterprise systems. Throughout my career, I have worked closely with developers, product managers, stakeholders, and international clients to transform complex business requirements into simple and usable digital experiences. I believe great products are built by understanding people first — my design process combines user research, business strategy, accessibility, design systems, and iterative testing.

EXPERIENCE

Professional Experience

Product Designer — Global 360 Ventures

Jun 2026 – Present

Product Designer — Genie InfoTech

Nov 2021 – Jun 2026 · Dhaka, Bangladesh

- Independently designed and launched 9+ mobile apps, including Maway, Limadi, Athkar, and Gifty.
- Led end-to-end design across mobile applications, SaaS platforms, and enterprise systems for long-term international client projects.
- One SaaS engagement ran approximately 3.5 years with a client in Denmark.
- Owned the full design process — user flows, wireframes, UI systems, testing, and developer handoff.
- Tools: Figma, Miro, Adobe XD, Zeplin.

UI/UX Designer (Part-Time) — Doodle's Design

Jan 2022 – Jun 2022

- Translated client requirements into high-fidelity UI designs for web and mobile.
- Worked remotely in a fast-paced, collaborative environment.

Junior UI/UX Designer (Freelance) — Doktorbhai App

Jun 2021 – Aug 2021

- Redesigned a medical mobile app UI for improved usability and new features.

Freelance Graphic Designer — Fiverr (Level 2 Seller)

2017 – Present

- Delivered 200+ projects, including logo and t-shirt design work.

EXPERTISE

Areas of Expertise

Product Design

UX Strategy

UI Design

Mobile App Design

SaaS Product Design

Enterprise UX

Design Systems

User Research

Wireframing

Information Architecture

User Flows

Prototyping

Accessibility

Interaction Design

Design Documentation

Cross-functional Collaboration

PHILOSOPHY

Design Philosophy

I believe that good design should be:

Human-centered

Accessible

Safe

Simple

Scalable

Business-oriented

I enjoy solving complex problems with elegant user experiences rather than adding unnecessary visual complexity.

FOCUS

Industry Focus

PRIMARY — HEALTHCARE

I am intentionally building my career toward Healthcare Product Design — designing systems that improve patient safety, clinician workflows, accessibility, and healthcare experiences.

Electronic Health Records

HIPAA-aware Design Thinking

Patient Portals

Doctor Dashboards

Medical SaaS

Appointment Systems

Healthcare Accessibility

Authentication for Healthcare Apps

SECONDARY — SAAS PRODUCTS

I enjoy solving complicated workflows inside business software.

CRM

ERP

Admin Panels

Internal Tools

Analytics Platforms

Productivity Software

SYSTEMS

Design System Knowledge

I have been investing significant time learning and applying modern design systems. My long-term goal is to become an expert in Design Systems and eventually grow into a Design System Manager role.

AWARDS

Awards & Recognition

Visionary Designer of the Year — 2024

Awarded by my team.

BEYOND DESIGN

Personal Interests & Personality

Interests

- Learning Arabic
- Quran Recitation
- Islamic Nasheed
- Traveling
- Cricket
- Writing Poetry

Personality

- Curious
- Detail-oriented
- Calm
- Analytical
- Growth-minded
- Patient
- Passionate about Learning

Inspirations: Don Norman (Human-Centered Design), Muzammil Hasballah (Quran recitation).

VISION

Professional Goals

- Becoming an internationally recognized Product Designer.
 - Becoming a Healthcare UX specialist.
 - Becoming a Design System expert.
 - Building a globally respected personal brand.
- Working with international companies.
 - Eventually running my own product design agency focused on Healthcare and SaaS.
 - Earning approximately USD 7,000–10,000 per month through product design.
